

## What the Professionals Are Saying .... .....About the Wheeled Snow Shovel

- Property Management and Maintenance companies are sold on the outstanding performance and proven durability of the Snow Wolf™ Wheeled Snow Shovel in commercial applications. The clean, green user-friendly alternative to blowers.
- Professional crews are clearing snow at apartments, hospitals, schools, parks, stadiums, city sidewalks and other facilities with increased efficiency and safety.
- Traditional snow shoveling is strenuous and can result in workers-comp claims.
- Both for pedestrians and operators snow blowers can be very dangerous.
- Even a single maintenance/repair event on existing snow blowers can be higher than the cost of a wheeled shovel, which also uses no fuel.

*“We have used these to move extremely heavy snow which could not be moved by a blower and would have killed the best of men. I have sold the blowers and am only using these tools. We cannot say enough positive about the wheeled shovels”.*

**-Andy Kropf - Director of Facilities  
Birch Bay Village Bar Harbor, Maine**

*“The backs of our crews thank you! “*  
**- Vincent Wright, Head School Custodian  
P.S. 132, Brooklyn, New York**

*“..the best piece of equipment we have at the mine. We use it for snow removal between buildings in record time. Even with the heavy, wet snow in Wyoming it just slides right off. We love it, love it, love it! “*

**- Debra Armstrong  
Raw Hide Mine, Wyoming**

*“No more workers comp claims“*  
**- Benno van Noort, Director of Facilities  
The New 42<sup>nd</sup> Street, Times Square, New York**

*“ Our snow removal crews have used the Snow Wolf with great success. To a man, the response was most positive. They were simple to put together. Easy to use. Kind on the back. Lightweight. Surprisingly durable...just ordered another six”*

**-Bob Brown, Grounds and Garage Supervisor  
Syracuse Housing Authority, New York**

Find out why professional property management, maintenance personnel and consumers alike are sold on the outstanding performance and proven durability of the Wheeled Snow Shovel. Discover the great new profit and productivity opportunity of the new Folding Frame Sno Wovel™, the Snow Wolf™ and how both wheeled snow shovels uniquely fill the big product gap between shovels and snow blowers.

## Feedback from Commercial Facilities

- ◆ **Cost:**
  - Even a single maintenance/repair event on existing snow blowers can be higher than the cost of a wheeled shovel, which also uses no fuel.
  - The Wheeled Shovels are maintenance-free, so in any event serve as cost-effective “backup” equipment in case of a snow blower breakdown.
  
- ◆ **Safety:**
  - Both for pedestrians and operators Snow Blowers can be very dangerous and carry risks of injury and property damage, but certainly cannot be used where pedestrian traffic is even sporadic.
  - Traditional snow shoveling can result in workers-comp claims, because it is very strenuous on the heart and back. It's also time consuming and costly.
  - The results of a March 2005 University of Massachusetts study verified that using the patented wheel-based snow shovel results in a 3-4 times reduction in lower back stress and cardio exertion.
  
- ◆ **Performance:**
  - Throws snow where you want it and controls drift or blow back.
  - Comparable if not better performance vs. snow blowers - especially when maintenance time, fuel and dedicated operator expense is considered.
  - Works in slush, wet snow - where snow blowers don't function or clog frequently...and even in depths over two feet.
  - Anyone can use it - No special operator required and it always starts.
  - 3 times faster than regular shovels – without stress & strain
  - Compact storage - Wheel comes off in seconds -Hangs on a wall like a shovel. Remove one bolt to fold more compactly - Lightweight (21lbs) and moves easily.

No Fumes No Noise No Gas No Maintenance No Storage Problems

## The Wheeled Shovel Top 5

- **Best Performance and Efficiency.** The optimum tool for removing large amounts snow in all snow conditions, from slush to over two feet of snow and are designed especially for heavy snow. 3 Times faster than shoveling with very little effort. The wheeled snow shovel outperforms snow blowers, without any maintenance, expense, fumes or noise.
- **Safest and Easiest on the body.** Performance testing by major ergonomic research center verifies a 3-4 times reduction in lower back stress and cardio exertion vs. conventional snow shovels. Greatly reduces strain, risk of injury and eliminates costly down-time & recovery from exhausting snow shoveling.
- **Price and Value.** Time is money and the wheeled snow shovels move more snow in 1/3 the time with no operating expense. With unpredictable winter snowfall an expensive snow blower is a poor investment. Accessories and replacement blades are available for endless usage on all surfaces in all types and depths of snow; from slush to hard pack to powder.
- **Maintenance-free and Stores easily.** Durability validated by Professional groundskeepers. Wheeled Shovel can hang flat on the wall like a shovel. Additionally, the new Sno Wovel™ features a unique Folding Frame for even more convenient frame adjustment, storage and portability.
- **Zero Energy and Greenhouse Gases.** Uses no energy or fuel. Gardener friendly; throws the snow away from delicate shrubs, will not damage stone or gravel landscaping.
